

Stringing Supplies

New Black Satin color!

FireLine® Braided Bead Thread

Fireline® is a microfused, braided bead thread consisting of Dyneema®, a gel-spun polyethylene which is known as the strongest fiber, per diameter, ever created. It has an unbelievably high tensile strength and has been recommended in numerous how-to articles on beadworking. The 4 & 6 lb. tests can be used with a #12 English beading needle, and 8 lb. can be used with a #10. Now available in Black Satin in addition to Smoke Grey and Crystal (not shown). We highly recommend ThreadZap® thread burning tools for cutting this thread.

50 & 125 yd spools (use #'s below to order)

Code	Description
